

How to connect your Instagram

It takes a few minutes and you only do it once. We connect your Instagram to verify your profile (followers and engagement) securely through Phyllo.

BEFORE YOU START, YOU NEED

- ◆ Instagram on a **professional** account (Creator or Business), not personal.
- ◆ A Facebook Page linked to that Instagram.

PART 1 · PREPARE YOUR INSTAGRAM (ONE TIME)

- 1 **Set your Instagram to a professional account**
Instagram → Settings → Account type and tools. If it says “Switch to professional account”, do it (Creator or Business). If it already is, skip this step.
- 2 **Link your Instagram to a Facebook Page**
Instagram → Edit profile → Page → connect or create your Page. Or from Facebook: your Page → Settings → Linked accounts → Instagram → Connect.

PART 2 · CONNECT IN CURATO

- 1 In your Curato dashboard, tick the authorization box and tap “Connect my Instagram”.
- 2 Log in to Facebook in the window that opens.
- 3 Choose “current Pages only” and select your Page.
- 4 Pick your Instagram with that same Page (the matching pair) and accept the permissions.
- ✓ Done: your Instagram is connected.

If you see “wrong combination of Instagram account and Facebook Page”

Your Instagram is not yet linked to that Facebook Page. Go back to Part 1, step 2, connect them and try again.
